Covering topics as diverse as the eponymous komodo dragons to earwigs, vampires and librarians, there is a poem here to suit everyone. Some are crying out to be read aloud – such as Bang a Drum- while others, like The Moment, are worth reading quietly and savouring. Some will make you think (Custodian), and others will make you giggle (Labrador). Some rhyme, some don't. My personal favourites have to be Lost in a Book and Librarians – celebrating the power of stories and the value of having someone to guide you through them. 	<p>Charlotte Guillian</p> <p>Non-Fiction</p>	<p>A beautiful fold-out book that showcases the wonders of the earth beneath our feet and one with real wow-factor. We recently used it to introduce Class 3's 'Under Our Feet' topic and there were gasps from the children. Sublimely illustrated, its concertina-style pages fold out into a long cross-section of the Earth: in one side and out the other. It contains a wealth of information about geology and science, and opportunities for further questions from curious young minds. Just stunning.</p>
	<p>Lucy Letherland</p> <p>Non-Fiction</p>	<p>The book is dedicated to exploring around the globe. The style of writing is engaging to children and addresses the reader directly. In addition to this, there are smaller chunks of text dotted around the illustration, each of which shares fascinating facts about the place and people associated with it. The language used is accessible but will also expand the children's vocabulary.</p>

There's something new to learn about on every page. Fictional guide Professor Astro Cat walks his readers through some of the key questions that children might have about the universe, and many more that they've probably never even thought about before. Where does our sun go at night? What are stars made of? If the Earth was a cherry tomato, what size would the other planets be (hint: Mars would be a pea and Jupiter a watermelon).</p>
